Discovery Kiosks

A hands-on interactive exhibit in which children of all ages are encouraged to discover through touch. Each free-standing unit contains four circular openings. On the top of each opening is a statement which serves as a clue to the object inside the opening. The unit opens to reveal the answer as well as the object inside.

Of the three discovery kiosks, each addresses a different subject - space, aeronautics, and commercialization.

Exhibit Specifications:

description: hands-on interactive
exhibit with four touch openings

color: red, blue

dimensions: 81" high x 36" wide

components: top section, upper and
bottom fins, touch box, graphic
